Finally – a Stairlift That Doesn't Scream "Stairlift!"

The Indigo IS350 Straight Stairlift

Forget everything you picture when you hear "stairlift." The Indigo IS350 is sleek, quiet, beautifully designed, and built to blend into the home – not take it over. It helps your loved ones stay independent, gives you one less thing to worry about, and lets everyone stop having that awkward conversation about the stairs.

Beautifully Quiet

The loudest thing in the room should be your dad explaining how nobody makes "real music" anymore. The Indigo glides smoothly and quietly, so the ride feels effortless from start to finish.

Fits the Home – Not Just the Stairs

A premium design with a slim profile that folds neatly away, because your parents spent years making their house their own.

Ready When the Power Isn't

Storm knocked out the lights? The Indigo's battery backup keeps moving even when the power doesn't. The efficient motor provides as many as up to 60 cycles on batteries during a power outage.

Every Detail Has a Purpose

"I didn't think I'd ever want a stairlift. I mean, I still didn't at the time of purchase. But now that I have the Indigo, it's grown on me. And thanks to it, I have my whole house back."
